MANAGEMENT DEVELOPMENT PROGRAMMES

Unit Level Data Collection Methodology, Data Processing and Applications

Elevate Your Research with Unit-Level Data Mastery in Social Sciences and Management.

October 6th -10th 2023 | Hybrid |
Certificate from GIM

Overview

For conducting research in social sciences and management we frequently use cross-section data. These data have two types – (i) Primary data; and (ii) Secondary data. The primary data is collected by the researchers by designing the samples based upon the types of their research. However, in the case of conducting research by employing secondary cross-section data researchers frequently face difficulties unless they don't have profound knowledge on the sample design and data collection methodology of the unit level secondary data. The fundamental objective of this programme is to make understand the scholars and researchers the sample design and data collection methodology of any unit level data collected by different organizations across different country settings. Indian researchers and foreign researchers, who are interested and who will attend the programme, can apply the most popular unit level datasets provided by National Sample Survey Office (NSSO), National Family Health Survey (NFHS) and Indian Human Development Survey (IHDS) in their research on Indian society. The researchers, who are conducting their research on primary data, will also get benefits by attending programme, since some methodologies for collecting primary data will also be presented in the programme.

Last Date of Registration

20 September 2023

Duration

5 Days – Sessions
10 AM to 5 PM

Format

Hybrid

Who Can Attend?

- The researchers of social sciences and management from India.
- The researchers of social sciences and management from foreign countries
- Ph.D. Scholars in Economics, Management, Sociology, Political Science, etc.
- Students with Master Degree from Economics, Management, Sociology, Political Science, etc.

Highlights/Outcomes

- To learn about the methodology of unit level data.
- To learn about the sample design of the unit level data collected by NSSO.
- To learn the sample design of the unit level data collected by IHDS.
- To learn about the different information on the households and respondents interviewed through NSSO and IHDS.
- To learn about the collection of primary data by conducting survey.
- To learn about the possible applications of the NSSO and IHDS data for conducting research.

Pedagogy

- Lecture through Power Point Presentation.
- Interactive Sessions.
- Hands on training for dealing with unit level data.

Programme Modules

- In this programme discussion on the following matters will be done

1. Method of collection of unit level data through multi-stage sampling.

2. Method of formation of sample design.

3. Coding and decoding the information collected through the interview.

4. Interpretation of different variables defined on the basis of information collected through interview.

5. Applications of the unit level data (NSSO, IHDS and NFHS) for different types of research in social sciences.

Programme Mentors

Dr. Anjan Ray Chaudhury
Assistant Professor
Durgapur Government College

Dr. Dipankar Das
Assistant Professor
Goa Institute of Management
