About Goa Institute of Management

Since its inception in 1993, the Goa Institute of Management (GIM) has consistently been at the forefront of industry excellence, nourishing students to bear the torch of conscious leadership. The total student strength at GIM exceeds 1000 students across five two-year full-time PGDM programs, including PGDM-General Management, PGDM-Healthcare Management, PGDM-Big Data Analytics, PGDM-Banking, Insurance, and Financial Services, and the International Double Degree in Analytics. Additionally, we offer the Fellow Program in Management and a hybrid program tailored for working executives.

GIM has been committed to bringing about a positive change in the environment it is operating. GIM is a member of the United Nations Global Compact (UNGC) Network India (GCNI) and a signatory of the United Nations Principles for Responsible Management Education (PRME).

About GIM's Community Outreach Projects

GIM aims at preparing students to be responsive and responsible leaders, poised to make a significant impact on society. To pursue that goal, our first-year postgraduate management students will engage in immersive field internship projects as a part of their service learning course. The students get involved in community outreach projects promoted by banks, schools, corporates, foundations, government departments, FPOs, and NGOs.

The internship project provides a unique opportunity for management students as it allows them to connect with the grassroots-level community, immerse themselves in understanding, and apply critical thinking and research skills to explore its challenges and solutions.

It offers a platform for the students to inquire & diagnose by data collection, reflect and co-create interventions for the beneficiaries in partnership with various relevant stakeholders. This collaborative approach aims to address pressing issues and foster meaningful improvements within the community. The course serves as a bridge between the learners and the grassroot level community.

Focus Areas

Over the past 13 years our **PGDM General Management** students have interned with public and private organisations that are involved in development projects focused on the following areas:

- ▶ Education-focused endeavours involve studying skill development needs, assessment & evaluation.
- ▶ Agriculture projects aiming to help farmers through market linkages, soil testing, and workshops, assessment and evaluation of utilization of agricultural schemes and loans.
- ▶ Public health initiatives include community awareness, health camps, service assessments, and hygiene campaigns.
- ▶ Various other development projects addressing financial inclusion, government scheme awareness, women empowerment, conservation efforts, and waste management which includes e-waste recycling from a lens of circular economy.

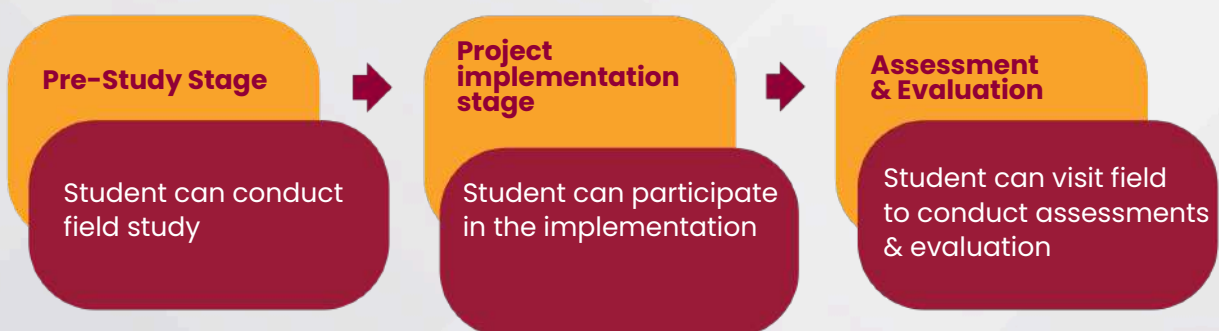

Duration of the Outreach Project

Field Immersion (Offline)

- Project implementation
- Project Assessment & Evaluation
- 25 Days

How our Students can Contribute?

Students are engaged in any of the stages described above: **Pre-study stage** involves planning and research, **Project implementation stage** includes hands-on activities and participation, and **Project evaluation and impact assessment stages** through data analysis. This structured approach ensures their meaningful contribution to the NGOs' and CSR organisations' initiatives.

51	The Efficacy of NGO Intervention in Ensuring Decent Work Conditions	55

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 1

Project Name: Mental Health awareness among College students, Goa

Client:Goa Livelihood Forum

Objectives: Increase understanding.Promote early detection.Provide resources.Encourage help-seeking behavior.Empowerment.Reduce suicide risk.Evaluate impact

Results:

The goals of increasing awareness, understanding and openness on the issue was certainly met; as when we asked the students and target groups before and after the session; stark differences could be witnessed in the form of the sense that prior to the session, the people were not knowing much or/and were hesitant to speak about this stigmatised topic. This was clearly reflected in the answers people gave post the session as prior to the

Impact:

They learned more about mental health. They knew more about the signs, how to get help, and where to go for support. i,· People weren't as scared to talk about mental health anymore. We had open and kind talks that made it okay to talk about tough feelings. i,· Students got ways to deal with stress, worry, and sadness, which are common problems. i,· The school became a safer and nicer place for those going

SDG's: 3,4,5

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 2

Project Name: Mental Health awareness among College students, Goa

Client:Goa Livelihood Forum

Objectives: Provide practical skills and knowledge to empower participants for their future careers/Facilitate interactions between students/workers and industry professionals to offer insights into career opportunities and industry trends/Enhance job-related skills and promote workplace safety among security guards and Eco-clean workers/Make sure each aspect of the society is aware and don't consider it as stigma and talks are initiated on this topics

Results:

While all project goals were pursued diligently, some may have been met more comprehensively than others due to varying factors such as prescheduled sessions and Exams and resource availability, participant engagement. However, continuous efforts were made to address evolving needs and challenges throughout the project duration, ensuring progress towards each goal. There were incident where we have approached a particular ITI college and upon reaching there we come to know that a certain batch were

Impact:

The community received several tangible benefits, including: Enhanced Knowledge and Skills: Participants gained valuable insights and practical skills in business management, career development, and workplace safety. Improved Stress free life: Empowered with relevant knowledge and skills, participants were better equipped to pursue Stress free opportunities and advance in their chosen fields. Increased Awareness: The project raised awareness about available resources and support services, addressing critical issues such as limited access to quality

SDG's: 3,4,6

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 3

Project Name: Mental Health awareness among College students, Goa

Client:Goa Livelihood Forum

Objectives: Improve the mental well-being of college students/boost mental health literacy/issue of stigma head-on.Finally, empowering students to seek help was a crucial aspect.

Results:

Our project in Goa aimed to improve mental health awareness and support systems for college students. Here's a look at how we achieved our goals: Increased Awareness and Understanding: Our presentations equipped students with fundamental knowledge about mental health, including common illnesses, signs and symptoms, and available resources. Interactive activities and discussions fostered engagement and a deeper understanding. Feedback forms, if available, could reveal a perceived increase in knowledge compared to pre-session surveys. Reduced Stigma

Impact:

The specific benefits that the community received at the end of our project included: 1. Increased Mental Health Awareness: One of the primary benefits was an increase in mental health awareness among college students. Through our presentations and educational sessions, students gained a better understanding of mental health issues, including common mental illnesses, signs and symptoms, and available support resources. This increased awareness empowered students to recognize the importance of mental well-being and take proactive

SDG's: 3,4,7

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 4

Project Name: Mental Health awareness among College students, Goa

Client:Goa Livelihood Forum

Objectives: Spread mental health awareness among as many people as possible so that we can make an impact on India's awareness on mental health issues. However, the specific target was to cover 600 beneficiaries in 12 sessions

Results:

If we take into account that there were two people took each session then all the goals were met entirely. We did more than 12 sessions and more than 600 beneficiaries as a group of two each. We think that the numerical goal is important but not as important as what we achieved by delivering the presentations. We were thanked, respected and asked to deliver again so that there can be more and more people

Impact:

The community was much more aware about the mental health issues that plague the society at the end of the project. There were numerous occasions where people told us that someone close to them were exhibiting the feelings, thoughts and behavior changes that we mentioned in the presentation but they were not aware that it can be a sign of mental health problem. However, they told us that they will talk to their close ones

SDG's: 3,4,8

SERVICE LEARNING AND RURAL IMMERSION : 23-24 – Group 5

Project Name: Mental Health awareness among College students, Goa

Client:Goa Livelihood Forum

Objectives: Increase Awareness.Reduce Stigma.Provide Information and Resources

Results:

To determine which project goals were met entirely and which were not, evidence from the project implementation and outcomes would need to be evaluated. Here's a breakdown of potential outcomes for each goal along with supporting evidence: 1. Increase Awareness: - Goal: Raise awareness about mental health issues among college students. - Evidence: Pre- and post-session surveys assessing participants' knowledge and attitudes toward mental health could demonstrate increased awareness. Additionally, attendance rates and engagement levels

Snapshots:

Impact:

The community received several specific benefits at the end of the mental health awareness project conducted by the group of six individuals. These benefits would have contributed to addressing the community's mental health challenges and promoting overall well-being. Here are some potential benefits and supportive evidence: 1. Increased Awareness and Understanding: One significant benefit would have been the increased awareness and understanding of mental health issues among college students. Through the awareness sessions, students would

SDG's: 3,4,9

SERVICE LEARNING AND RURAL IMMERSION : 23-24 – Group 6

Project Name: Waste Management Project

Client: The Saahas Zero Waste

Objectives: To assess waste management practices within luxury hotels and resorts, focusing on waste generation, disposal, and potential recycling efforts and the current waste management practices at the household level within Curtorim and Velim Village Panchayat.

Results:

Operations Project Entirely Met Goals: • Assessment of waste management practices in diverse settings. • Identification of strengths, weaknesses, opportunities, and threats related to waste management. • Development of actionable recommendations for improving waste management practices. Partially Met Goal: Evaluation of Organic Waste Converter (OWC) and Bio Gas Plant effectiveness: While data was collected, achieving comprehensive analysis and effectiveness evaluation was hindered due to limited access to certain data and infrastructure. Research Project Entirely Met

Snapshots:

Impact:

Operations Project: The specific benefits that the community received at the end of our project were numerous and varied depending on the specific context of each community we engaged with. One primary benefit was an improvement in waste management practices, which resulted in cleaner environments, reduced pollution, and enhanced public health.. Additionally, by involving community members in waste management initiatives, we empowered them to take ownership of their environment, fostering a sense of pride and

SDG's: 9,11, 12, 13, 14, 15

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 7

Project Name: Waste Management Project

Client: The Saahas Zero Waste

Objectives: Improving waste management practices, raising awareness about proper disposal methods, enhancing infrastructure for waste collection, and fostering community engagement in sustainable initiatives

Results:

Entirely Met Goals:

- Assessment of waste management practices in diverse settings.
- Identification of strengths, weaknesses, opportunities, and threats related to waste management.
- Development of actionable recommendations for improving waste management practices.

Impact:

At the end of the project, the community benefited from improved waste management infrastructure, heightened awareness about proper disposal practices, and increased community participation in sustainable initiatives. To ensure the community continues to use the benefits, strategies like ongoing education and awareness programs, community-led initiatives, and partnerships with local stakeholders can be implemented. Empowering community members to take ownership of sustainability efforts can also foster long-term sustainability.

SDG's: 9,11, 12, 13, 14, 16

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 8

Project Name: Community Immersion

Client: Barefoot College

Objectives: Evaluate the effectiveness of the training program for rural women in Tilonia who were tasked with making solar lanterns. Identify any challenges, shortcomings, or gaps in the training process that hindered the women's ability to produce high-quality solar lanterns. Assess the impact of the solar lantern production initiative on the economic empowerment and skill development of the rural women. Provide recommendations and strategies for improving the training program and addressing any identified issues to enhance its effectiveness and sustainability

Results:

We achieved our goal of evaluating the training program's effectiveness and providing ongoing assessment tools through efficient resource utilization. By developing an interactive dashboard, Barefoot College could track and analyze training progress in real-time, enabling informed decisions and prompt adjustments. This allowed program managers to identify performance trends and intervene as needed. Additionally, our proactive design of the FMEA model framework identified potential risks and mitigation strategies, ensuring the project's overall success.

Impact:

We developed an interactive dashboard for Barefoot College to track women trained, country-wise representation, and more, with automatic data updates. Barefoot College can add new issues, implement recommendations, and assess changes. We committed to regular updates and maintenance of both tools, ensuring they remain functional, relevant, and responsive to feedback.

SDG's: 1,2,3,4,5

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 9

Project Name: Community Immersion

Client: Barefoot College

Objectives: Reducing the cost of the Super5 packaging/measures to optimize the operations of the Super5 project

Results:

The primary goals of the stock-keeping system digitization project at Super5 initiative have been successfully achieved. The digitization process has indeed streamline our processes and enhanced efficiency across various aspects of our operations. By replacing manual work with advanced formulas, we have minimized discrepancies and improved accuracy in our stock-keeping procedures. However, it is important to note that while the overarching goals of the project were met entirely, there have been some challenges in one

Impact:

Financial Benefits: We saved money for Super5 by finding cheaper vendors. This means Super5 has more money to spend on important things like making new products or growing the business. By finding the vendors who provide the cheaper rates for packaging material as compared to the current vendor from ajmer to spend less on buying things, Super5 can stay focused on helping the community through its goal of providing employment opportunities to women and working

SDG's: 1,2,3,4,6

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 10

Project Name: Awareness and Prevention of Rabies & vaccination

Client: Mission Rabies

Objectives: Increasing awareness about rabies within local communities/primary aim is to prevent the spread of rabies by educating individuals about the disease, its transmission, and methods of prevention/advocating for the humane treatment of animals/collect data on rabies incidence and identify areas where additional intervention may be needed

Results:

The project successfully achieved its goals of disseminating awareness to communities through various means such as conducting surveys, staging skits, and providing education on topics including recognizing rabid and chasing dogs, as well as raising awareness about Rabies prevention. Essential knowledge on post-dog bite actions like immediate handwashing and seeking medical attention was effectively imparted. Moreover, communities were informed about the Mission Rabies hotline number, facilitating rapid reporting of suspected rabid dogs.

Impact:

The communities experienced specific benefits from our efforts, notably through conducting KAP Surveys alongside presentations, which significantly enriched their understanding of Rabies. By administering the survey before and after the presentation, we effectively gauged and improved their knowledge levels regarding Rabies. Furthermore, the presentations equipped them with crucial information on how to handle various situations involving dogs, including what actions to take when approached or chased, as well as pre- and post-bite protocols.

SDG's: 3

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 11

Project Name: Awareness and Prevention of Rabies & vaccination

Client: Mission Rabies

Objectives: To contribute to increasing awareness about rabies within local communities/to prevent the spread of rabies by educating individuals about the disease, its transmission, and methods of prevention/promoting vaccination programs to protect pets and stray animals from rabies, as well as advocating for the proper care and handling of animals to reduce the risk of disease transmission. To collect data on rabies incidence and identify areas where additional intervention may be needed

Results:

The project successfully achieved its goals of disseminating awareness to communities through various means such as conducting surveys, staging skits, and providing education on topics including recognizing rabid and chasing dogs, as well as raising awareness about Rabies prevention. Essential knowledge on post-dog bite actions like immediate handwashing and seeking medical attention was effectively imparted. Moreover, communities were informed about the Mission Rabies hotline number, facilitating rapid reporting of suspected rabid dogs.

Impact:

The communities experienced specific benefits from our efforts, notably through conducting KAP Surveys alongside presentations, which significantly enriched their understanding of Rabies. By administering the survey before and after the presentation, we effectively gauged and improved their knowledge levels regarding Rabies. Furthermore, the presentations equipped them with crucial information on how to handle various situations involving dogs, including what actions to take when approached or chased, as well as pre- and post-bite protocols.

SDG's: 3

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 12

Project Name: Livelihood Project for women rescued from Sex traffic

Client: ARZ India

Objectives: Create operational flowchart. Create financial analysis and break even analysis. Create sales strategy. Client mobilization. Create business upgradation strategy report

Results:

Creating operational flow chart. Create Financial and Breakeven analysis:- We have not only created breakeven analysis but also provided different scenarios and combinations to be profitable as at a time only 2 out of 3 machines can work for ppp units. Also most of the work at upcycling and POTI unit is done manually. So we provided them with different scenarios. Creating sales strategy:- A proper sales strategy has been made and explained to them based on

Impact:

Making a Difference: How Our Project Helped Our project aimed to help sexually trafficked women rebuild their lives, and here's how we made a positive impact: **Financially Stable:** By helping them understand their finances better, we showed them how to make their businesses profitable in the long run. This means they'll be able to keep creating jobs and helping more women in the future. **More Customers, More Opportunities:** We came up with new

SDG's: 1, 2, 5, 8, 10, 16

SERVICE LEARNING AND RURAL IMMERSION : 23-24 :Group 13

Project Name: Livelihood Project for women rescued from Sex traffic

Client:ARZ India

Objectives: The objective of the project is to analyze various units within the organization, including the paper production unit, upcycling division, stitching and screenprinting department, laundry facility, and storage units.

Results:

All goals except getting the desired number of new clients was not met. Due to a shortened project duration, we faced difficulty in mobilizing new clients effectively

Impact:

The community experienced a multitude of benefits that directly addressed their challenges. These included increased productivity through structured operational processes, optimized pricing strategies, and expanded sales channels. Evidence such as quantitative data showcasing higher production volumes and improved profit margins supported these outcomes. Moreover, the community witnessed improved socio-economic conditions, evidenced by higher incomes, job stability, and economic resilience, attributable to project interventions. Strengthened operational systems and diversified revenue streams further bolstered community resilience against

SDG's: 1, 2, 5, 8, 10, 16

SERVICE LEARNING AND RURAL IMMERSION : 23-24 :Group 14

Project Name: Education project

Client:Pratham

Objectives: Education Enhancement.Livelihood Improvement.Community Empowerment

Results:

While progress was made in promoting economic empowerment through vocational training and entrepreneurship support, achieving long-term economic sustainability proved challenging. Evidence includes the establishment of small businesses and increased income generation among participants. However, sustaining these economic activities beyond the project duration requires ongoing support and further investment in business development.

Impact:

Improved Access to Education: Through our initiatives, such as providing educational resources, organizing tutoring sessions, and capacity-building for teachers, the community experienced improved access to quality education. As a result, children were better equipped with knowledge and skills essential for their academic and personal development. Supportive evidence for these benefits includes: Quantitative data collected through surveys, demonstrating improvements in educational attainment, healthcare access, and economic indicators. Qualitative feedback from community members, highlighting their perceptions of

SDG's: 4,5,10

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 15

Project Name: Education project

Client: Pratham

Objectives: To compare the difference between the enrollment and learning levels of students in the age group of 3 to 16 years. Also, to evaluate all the factors that contributed in the active learning of the children in their household

Results:

The project goals that were met entirely was to cover all the parameters that we needed for our survey and we were able to meet the Sarpanch and also visit a government school. We were asked to visit 210 households in total as a group. We reached close to the 200 mark because everyone were covered. So this was something which was not entirely met.

Impact:

At the end of the project, the decision makers get an insight into what needs to be improved so that the learning level of the children can improve further be it by correcting some things at the households or at the schools/ community level. Some peculiar problems were that despite studying in higher grades, students were not able to solve elementary problems and this helped create an awareness that in this fast changing world thereâ€™s

SDG's: 4,5,10

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 16

Project Name: Disability Project

Client: Access for all foundation

Objectives: Main goal was to help the disabled community by providing them access to learning and help them financially to manage the institutions.

Results:

We were able to fully appreciate the picture of special education in the country, its associated laws and improvements required in this field by engaging with various resource persons and field workers in this domain. One of our tasks was to identify special schools across the country that the client organization Nirant Foundation (a sister organization of Access for All Foundation) can partner with. Ideally it would involve listing out the special schools from across

Impact:

First, the community was introduced to art-integrated learning, which was not prevalent at every school we visited. So, the students and as well as teachers now know about a new form of learning which can greatly help special children, as certainly traditional form can't be used to teach them. It is also seen that via Art Integrated Learning children grasp knowledge much faster. Second, the Access for All-Nirant Foundation might provide schools with an Inclusive

SDG's: 1,2,3,4,5, 8, 10

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 17

Project Name: Disability Project

Client: Access for all foundation

Objectives: To understand the disability ecosystem by gathering data of various schools in our assigned state by talking to stakeholders

Results:

The evaluation of the school on the given parameters from our client was successfully completed from our end. We also conducted an interactive Indian heritage related activity session with the students as they asked us to do. Documentation of the activity session, snippets of children doing the activity and images of the school along with premises have been done from over end.

Impact:

With the help of our evaluation and assessment, the schools will have access to a resource library altered and catering to their needs. This will be to ensure that we are solving the issue of lack of advanced resources for the students that are catered to their needs and requirements. Activity sessions conducted by us and the documentation of the same will help Access for All gauge the needs of students and the schools. Studentâ€™s

SDG's: 1,2,3,4,5, 8, 11

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 18

Project Name: Studying the effectiveness of skill development training program

Client: ISEAF (Skill Development Centre for School Dropouts Youngsters)

Objectives: Evaluate the effectiveness of the vocational training programs offered by ISEAF in empowering youth to pursue careers aligned with their skills and interests/Develop strategies to enhance enrollment in these vocational institutes by attracting more students and promoting the value of vocational education.

Results:

Met Goals: **Effectiveness of Existing Courses:** Our project successfully evaluated the effectiveness of existing courses offered by ISEAF institutes through qualitative interviews with passed-out trainees. The data collected provided valuable insights into the perceived benefits and shortcomings of these courses, allowing us to assess their overall effectiveness in fulfilling the institute's mission. **Strategies for Increasing Enrolment:** We proposed comprehensive strategies for enhancing enrolment at ISEAF institutes by improving targeting and outreach efforts. These

Impact:

Benefits to the Community: The culmination of our project yielded several tangible benefits for the community, particularly in enhancing the effectiveness of vocational education initiatives and addressing the challenges faced by passed-out trainees. These benefits include: 1. Improved Employability and Livelihoods: Through our research and interviews with passed-out trainees, we identified areas where vocational education had positively impacted their employability and livelihoods. Many participants shared success stories of securing gainful employment in industries relevant

SDG's: 1,2,3,4,5, 8, 12

SERVICE LEARNING AND RURAL IMMERSION : 23-24 :Group 19

Project Name: Assessment of Water Sanitation & Hygiene (WASH), infrastructure in schools

Client: Water Aid

Objectives: Assess the existing water, sanitation, and hygiene (WASH) conditions of the schools within the targeted community/Improve water sanitation and hygiene practices.Raise awareness and educate the community.Ensure sustainabilityPromote behavior change.Ensure sustainability

Results:

In our project, several goals were met entirely, while others may have faced some challenges or were not fully achieved. Goals that were met entirely: â€¢ Improved Access to Clean Water: Evidence of this can be observed through quantitative data showing an increase in the number of functional water sources, such as taps or hand pumps, within the community. Additionally, community feedback and testimonials may indicate satisfaction with improved access to clean water for drinking

Impact:

At the end of our project, the community received several specific benefits that helped address their water sanitation and hygiene (WASH) challenges: â€¢ Improved Access to Clean Water: Through infrastructure improvements and water purification initiatives, the community gained increased access to clean and safe drinking water. This reduced the risk of waterborne diseases and improved overall health and well-being among community members.Enhanced Sanitation Facilities: Upgrades to sanitation facilities, such as the construction of new toilets

SDG's: 3,6

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 20

Project Name: Water Aid Assessment of Water Sanitation & Hygiene (WASH), infrastructure at Health care facilities

Client: Water Aid

Objectives: To assess the water, sanitation, and hygiene (WASH) infrastructure at healthcare facilities in rural areas, identify gaps and deficiencies in the existing setup and propose or to improve access to clean water, sanitation, and hygiene recommend sustainable solutions

Results:

While all project goals were substantially addressed, challenges such as limited resources and systemic barriers prevented us from achieving complete coverage and impact. However, tangible improvements in WASH infrastructure and community engagement are expected once a comprehensive report is submitted to our community partner Water Aid India. In terms of coverage, some of the states like Odisha and Uttar Pradesh had logistical challenges which did not enable us to complete surveys in a minimum of

Impact:

The specific benefits that the community received at the end of our project would include improved access to clean water and sanitation facilities at healthcare facilities, enhanced awareness about hygiene practices, and strengthened community partnerships. This would help mitigate health risks associated with waterborne diseases and improve overall well-being. From our survey data, organizations like Water Aid India who are trying to enforce changes in the healthcare facilities with regards to clean water, sanitation and

SDG's: 3,6

SERVICE LEARNING AND RURAL IMMERSION : 23-24 :Group 21

Project Name: WASH

Client: Ambuja Foundation

Objectives: Assessing the water, waste management, and sanitation situations within the village

Results:

Goals Likely Met: Infrastructure Development: There's evidence suggesting successful infrastructure projects in some villages. Examples include: Door-to-door waste collection: This program, if implemented effectively, could lead to improved sanitation and waste management. **Goals Needing Further Assessment: Community Empowerment:** While we might have encouraged participation through focus groups, the long-term impact on community empowerment remains unclear. Here's why: **Limited interaction time:** Our short stay in the villages might not have allowed for a deep understanding of

Impact:

At the end of our project, the community benefitted from comprehensive research and detailed insights into water sanitation and waste management issues, challenges, and potential sustainable solutions. This information empowered our client, ACF, with actionable data to address the community's needs effectively and develop long-term plans for village development. The specific benefits include: **In-Depth Analysis:** Our research provided a thorough understanding of the water sanitation and waste management challenges faced by the villages, including root

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 22

Project Name: Livelihood project tribal community living in the forest

Client: TigerWatch

Objectives: Measuring Impact. Vocational upskilling & development. Learning from others

Results:

The group met all the 3 goals in their entirety. Following are the evidences of the same:
Measuring Impact: The group analyzed and presented data on village-wise attendance, current status, and progress through analysis of attendance and academic progress, teacher's perspective etc.
Skilling for the future: The group analyzed and recommended areas of improvement in the existing vocational programs being run by the organization.
Learning from others: The group found various programs by different organizations and recommended

Impact:

Improved Educational Outcomes: Through our analysis and recommendations, the community witnessed improved educational outcomes among the Mogyia children participating in the program. This included higher academic performance, increased school attendance rates, and enhanced literacy and numeracy skills among the beneficiaries.
Enhanced Program Effectiveness: Our recommendations inspired by successful strategies from other NGOs helped enhance the effectiveness of Tiger Watch's education program. By incorporating proven methodologies and best practices, the program became more efficient

SDG's: 1,2,3,4,5

SERVICE LEARNING AND RURAL IMMERSION : 23-24 :Group 23

Project Name: livelihood projects

Client: Village Square India

Objectives: Our goal was to research on the livelihood of the people in the Araji line block of Varanasi, and to learn about the scheme made available by the government. It also involved searching for other livelihood options for the women in this region.

Results:

Without specific project goals outlined, it's difficult to assess which were entirely met or not. However, the team appeared successful in gathering community knowledge and researching government schemes, but may have fallen short in implementing sustainable livelihood solutions or addressing critical problems comprehensively.

Impact:

Potential benefits included increased awareness of government schemes, identification of alternative livelihood opportunities, capacity-building initiatives, and facilitation of linkages with stakeholders. These could help address inadequate remuneration for agricultural produce, access to markets, and limited livelihood options by providing knowledge, skills, and connections to overcome such challenges. Strategies could include developing a sustainability plan, identifying and training local champions, forming community-based organizations, advocating for policy changes and resource allocation, and conducting periodic follow-ups to provide guidance

SERVICE LEARNING AND RURAL IMMERSION : 23-24 : Group 24 A

Project Name: livelihood projects

Client: Village Square India

Objectives: To perform the onboarding of the beneficiaries for the Carbon Credit Financing project on the Acron application. To conduct a baseline survey of farmers to have a better understanding of the socio-economic condition of the community

Results:

The goal of performing the training of Baghwani Sakhi was multiple staged. Due to the occurrence of the Lok-Sabha elections and the cancellation of the training on the day itself by the state team. Our team was unable to provide training to the 148 Baghwani didis identified by our team of 2 along with the Block Project Officers. To support the process itself we planned a Two-day training seminar where we would provide the knowledge

Impact:

Through our project work, we had ensured that the Baghwani Sakhis get proper training for onboarding the beneficiary farmers in the Acron application. This would register the beneficiary farmers for the Carbon Credit Financing project that would benefit the farmers in near future as they would be incentivized for their plantation. Also, the baseline survey would project a holistic and clear picture of the socio-economic and cultural scenario of the entire community, that would help

SERVICE LEARNING AND RURAL IMMERSION : 23-24 :Group 24 B

Project Name: KAPS(Knowledge,Attitude,Practice,Survey towards Awareness &Prevention of Rabies)

Client:Internal GIM

Objectives: Measure the Public Understanding of Rabies/Evaluate Ideas about Necessary Treatments.Assess Attitude Toward Free-Roaming Dogs

Results:

Several goals were achieved such as-

- Increased Public Understanding of Rabies
- Accessed Awareness of Rabies Treatment
- Understanding Attitudes Towards Free-Roaming Dogs

Impact:

The community likely reaped several benefits from your rabies awareness project, directly addressing the problem of limited knowledge and potentially unsafe practices regarding rabies. By educating the community about the crucial steps to take after a potential rabies exposure, the project empowered individuals to protect themselves and potentially prevent the disease's spread. Providing the analysis reports to the administration and the estate manager will give them an idea of how to orient the awareness campaigns

Objectives: Our project had a multi-pronged approach to assess the impact of NGOs in the Bangladeshi garment industry

Results:

Goals Met Entirely: â€¢ Reviewing Existing Data: We could successfully analyzed existing reports from government agencies, research institutions, and NGOs to understand the broader context of worker conditions and existing interventions. â€¢ Stakeholder Interviews: Interviews with NGO staff have provided valuable insights into their programs, challenges, and perceived effectiveness, fulfilling this goal partially if not entirely. Evidence: â€¢ Citations in Report: Our final report includes citations and references to the data sources we reviewed. â€¢

Impact:

Our project aimed to enhance working conditions in the Bangladeshi garment industry through increased awareness and advocacy. We analyzed data on NGO interventions, provided recommendations for policy change, and highlighted successful NGO efforts. Though our direct impact on workers was limited, we laid a foundation for future work by establishing connections and empowering organizations with valuable information. Disseminating findings through reports, publications, and presentations, and building long-term relationships with NGOs and worker support organizations, has created a ripple effect that contributes to improving the industry's conditions and supporting worker rights over time.

SDG's: 16

Project Summary

CLIENT	PROJECT TYPE	LOCATION	SDG
Access for All Foundation	Livelihood	Kerala, Uttar Pradesh, Maharashtra, Chattisgarh, Madhya Pradesh	1, 2, 3, 4, 5, 8, 10
Aident	Sanitation	Odissa & Jharkand	1, 2, 3, 4, 5
Ambuja Foundation	Sanitation	Gujarat, Maharastra, Rajasthan	3, 5, 6
ARZ India	Livelihood	Goa	1, 2, 5, 8, 10, 16
Barefoot College	Livelihood	Rajasthan	1, 2, 3, 4, 5
Give Goa	Environment	Goa	11, 12
Give Goa	Livelihood	Goa	9, 10
Endometriosis Awarness Campaign	Health	Goa	3, 4, 5
GCCI-NABARD	Livelihood	Goa	1, 2, 3, 4, 5, 8, 10
